Summary

Experienced Game programmer and C++ Engine Developer, with 5 years of experience, specializing in video game engine programming. Skilled in high-performance solutions for complex problems in cutting-edge gaming environments. Passionate about the entire process of game development and understanding how everything works and why it was built that way. Recognized for excellent teamwork skills, flexibility, and multitasking abilities. MSc. in Games and Media Technology (Comp. Sci.). Summa Cum Laude BSc. in Computer Science graduate. Fluent in English and Spanish.

SKILLS

- C/C++
- C#
- Rust
- CMake/Ninja/VS Build Tools
- GLSL/OpenGL
- Unity/Unreal
- Python
- Git/Perforce
- Visual Studio/VSCode/10x

Work Experience

King

Berlin, Germany

SENIOR C++ DEVELOPER

Mar. 2025 - NOW

Client Tech Dev at Catalog Games. Maintaining, upgrading, and fixing the core tech that runs 8 live services games. As well, improving tooling for our games (including tools based AI, orchestration, LLMs, prompting, and agents). Finally, helping with AI adoption to improve productivity (9% faster lead time)

Neon Koi (PlayStation Studio)

Berlin, Germany

ENGINE PROGRAMMER

Dec. 2023 - Jan. 2025

Set up device support targets and spec investigations for mobile devices to improve player support. Optimized and set performance tracking systems for mobile phones and backend services. Solved hard-to-track bugs and improved debuggability by setting up helper systems. Collaborated with Graphics to solve hard-to-track device-dependent shader bugs. Improved code quality and upkeep by setting up helper systems. Worked on UE 5.

Cloud Imperium Games

Manchester, The UK

ENGINE PROGRAMMER I

Sep. 2022 - Sep. 2023

Improved, optimized, and maintained the entity system (object streaming) that runs Star Citizen (live service) and Squadron 42. Experienced several full patch live cycles with release support. Improved multi-threading debuggability.

uCrowds

Utrecht, The Netherlands

C++ DEVELOPER INTERN

Nov. 2021 - June 2022

Developed the base of uCrowds' Unreal Engine 5 high-performance crowd simulation plugin under the supervision of Prof. Roland Geraerts. Focused on performance, and usability using the Blueprint System.

hauzd

Caracas, Venezuela

C++ ENGINE DEVELOPER

Sep. 2019 - Nov. 2020

Helped our clients show their work from the architectural planning stages, by integrating Building Information Modeling (BIM) from Revit's (Autodesk) C# interface to the hauzd C++ Engine in real-time.

Education

Utrecht University

Utrecht, The Netherlands

MSC. IN GAME AND MEDIA TECHNOLOGY (COMP. SCI.)

Sep. 2020 - Jul. 2022

Took courses on Optimization, Geometric Algorithms, Ray Tracing, Game Physics, and Crowd Simulation.

Universidad Simón Bolívar (USB)

Caracas, Venezuela

B.S. IN COMPUTER SCIENCE (5 YEAR DEGREE)

Nov. 2013 - Mar. 2020

Took courses on Languages and Compilers, Artificial Intelligence, Machine Learning, Databases, and AR.

Faculty of Engineering (LTH), Lund University

Lund, Sweden

COMPUTER SCIENCE EXCHANGE STUDENT

Oct. 2017 - Jun. 2018

Developed my Degree Project in Computer Science (Master's level) on Computer Graphics (TAA) using C++ and OpenGL. Took courses on Computer Graphics and Robotics at master's level.
